

MTD-CARBOTEC-FB

The MTD-CARBOTEC-FB grades are non woven polyester fibres, which have been posttreated with activated carbon. These materials offer the advantages of activated carbon without the handling problems associated with loose powders. Our standard range weight and loft is the FB6-2.0FR.

Applications include colophony solder fume removal, ozone removal in office equipment, tobacco smoke and odour removal in domestic and industrial applications and waste water treatment.

The FB6-2.0FR filter is designed to fit into the MTD-DBF filter box range.

Odour Control

- Traffic fumes
- Slurry spreading
- Smoke

MTD-CARBOTEC	FB6-2.0FR
Nominal Loft mm	3
Product Weight gsm	230
Carbon Weight gsm	47
Carbon Weight %	20
CTC Absorption % (internal)	8
CTC Absorption Kg/m ³ (internal)	6
Flammability (FMVSS302 indicative)	Self extinguishing
Colour	Black
